The Call for Papers of PCIM Asia 2019 is now open. Industry and science experts are cordially invited to submit abstracts on the latest technological trends and applications in the Asian power electronics industry by 31 December 2018. The conference and its accompanying exhibition will take place from 26 – 28 June 2019 in the Shanghai World Exhibition and Convention Center.

PCIM Asia, a specialised event for power electronics, intelligent motion, renewable energy and energy management, will return in June next year. The last edition was attended by 91 exhibitors from eight countries and regions who occupied 7,000 sqm of exhibition space. The range of leading edge products and solutions on offer attracted 5,388 visitors.

Held in parallel with the exhibition is the PCIM Asia Conference, one of the most important and influential conferences for power electronics in Asia. Professionals from industry and academia will have the opportunity to present their latest research in poster or oral presentation on technological trends and applications in the Asian power electronics industry. Last year, a total of 67 conference papers were presented and 382 conference attendees were present. The conference's Call for Papers is now open; particularly welcome are contributions dealing with the latest developments and expectations related to future trends and their applications for the growing demand of power electronics in Asia. The important dates are as below:

- Abstract submission deadline: 31 December 2018
- Notification of acceptance deadline: 8 March 2019
- Full paper submission deadline: 30 April 2019

Commenting on the conference in 2018, Professor Dr Leo Lorenz, Chairman, PCIM Advisory Board, shared: "The individual presentations are at a high technical level. It's very important for the industry that you have Chinese industry players displaying their work here, and this conference does attract quality Chinese companies. For international participants, the main benefit for them to attend is to find out what's going on in China. China is a key market for everyone in the industry and PCIM is a platform the industry needs as a door to China."

26 Harbour Road
Wanchai, Hong Kong

Comprehensive conference topics cover the latest industry trends

As in the past, the conference covers a wide variety of industry fields, including E-Mobility, Charging Stations and Semiconductors. The conference will be conducted in English. Conference topics include:

- Environmental Friendly and Renewable Energy Technologies
- Advanced Power Semiconductors
- Passive Components and Integration
- AC/DC Converter
- DC/DC Converter
- Digital Power Conversion
- Motor Drive & Motion Control
- High Frequency Power Electronic Converters and Inverters
- Automotive Power Electronics
- Power Quality Solutions
- Smart Grid Power Electronics
- Power Electronics in Transmission Systems

Furthermore, this year PCIM Asia puts forward six new subheadings under these 12 headlines in order to explore the new potential market and technological trends in the following areas. These include:

- Gate Driver
- IPM and System Integrated Module
- Lamp Ballasts and LED Lighting
- Advanced Motor Concepts for Industrial Application and Traction Drives
- New Control Architectures DSP, Microcontroller or FPGA
- Wireless Power Transfer

International promotion opportunities and awards for industry contributors

PCIM Asia offers all players in the power electronics industry an international stage with excellent possibilities for development. All the papers accepted will be published in the PCIM Asia conference proceedings, as well as in the scientific databases of IEEE Xplore and IET Inspec Direct. Conference contributions will also be considered for oral presentations or posters. All submitted abstracts will be reviewed by the international Board of Directors and the Technical Committee. The best contribution in the categories "Young Engineer" and "Best Paper" will be honoured during the event with an award and a prize money of RMB 8,000 each.

PCIM Asia is jointly organised by Shanghai Pudong International Exhibition Corp, Guangzhou Guangya Messe Frankfurt Co Ltd and Mesago Messe Frankfurt GmbH. The fair will be held from 26 – 28 June at the Shanghai World Expo Exhibition and Convention Center to showcase the latest offerings in the power electronics industry.

Background information on Messe Frankfurt

Messe Frankfurt is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With more than 2,400 employees at 30 locations, the company generates annual sales of around €669 million. Thanks to its far-reaching ties with the relevant sectors and to its international sales network, the Group looks after the business interests of its customers effectively. A comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services. With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent).
